

# Series FT11XX

## Miniature Flush Diaphragm Pressure Transducers

### Description

The FT11XX is an extremely small, accurate and reliable flush diaphragm pressure transducer. Rugged, long-lived, robust bonded foil strain gage technology is employed to provide static and dynamic pressure measurement. Additionally, the unit provides a low sensitivity to shock and vibration, infinite resolution, and excellent transient response times through a wide temperature range.

The standard unit provides either 1-5 Vdc or 4-20 mA output. As with all of Stellar Technology's products, this unit offers many mechanical adaptations which compliment Stellar Technology's "Application-Solutions" to meet the demands of today's marketplace. The brief specifications listed on the back are but a few of the more important parameters of interest. Make sure to contact the sales office closest to you for further definition.
