**Series LLC65X**

Long Stroke LVDT Displacement Transducer, 4-20 mA Output, Captive Guide Armature

**Description**
The Series LLC65X is a high performance long stroke DC powered LVDT displacement transducer with a captive guided armature. These units have built-in LVDT electronics which allows for a DC supply of 12 to 36 Vdc and a 4-20 mA current output. The armature is captured in the LVDT housing and is guided by a low-friction bearing assembly. These LVDT’s have a total stroke range of 1 to 37 inches. The Series LLC65X displacement transducers can be used for both static and dynamic applications. These displacement transducers are ruggedly constructed of all stainless steel. All Series LLC65X displacement transducers are shipped with traceable calibration certificates.

**Standard Features**
- Stroke ranges from ±0.5 inches to ±18.5 inches
- 4-20 mA Current Output
- Captive Armature
- Low Friction Bearing Assembly
- DC/DC
- ±0.5% Linearity
- Encapsulated Integral Electronics
- All Stainless Steel Construction
- Traceable Calibration Certificate

**Optional Features**
- Improved Linearity
- Self Aligning Rod-End Bearings
- Sealing Against Moisture Ingress
- Mounting Blocks

**Performance**

#### Electrical Characteristics

- **Supply Voltage**: 12 Vdc to 36 Vdc.
- **Max Loop Resistance**: (Supply Voltage – 11) x 50 Ohms.
- **Output Ripple**: 50 μA (peak-to-peak).
- **Electrical Output Bandwidth**: 200 Hz.
- **Electrical Termination**: 6 ft. Polyurethane Shielded Cable (Radial Exit).

#### Environmental Characteristics

- **Operating Temperature Range**: +14°F to +158°F.
- **Temperature Effect on Zero**: ±0.006%/°F (typical).
- **Temperature Effect on Span**: ±0.017%/°F (typical).

#### Mechanical Characteristics

- **Case Material**: Stainless steel.
- **Armature Type**: Captive Guided.
- **Probe Thread**: M5 x 0.8.
- **Set-ups**:
  - Please Specify Set-up Required:
    - Set-ups (Position) | (Position) | (Position)
    - 1 | 4mA | 12mA | 20mA
    - 2 | 20mA | 12mA | 4mA

#### Modifications and Warranty

**MODIFICATIONS**: We realize transducer applications vary greatly and as such our designs are flexible. Choice of pressure port, electrical termination, material compatibility and performance characteristics are a few of the many options available. Specifications on this datasheet represent the standard configuration only. Product and company names listed are trademarks of their respective companies. Specifications subject to change without notice.

**WARRANTY**: Stellar Technology warrants that its product shall be free from defective workmanship and/or material for a twelve month period from the date of shipment, provided that Stellar Technology’s obligation hereunder shall be limited to correcting any defective material FOB our factory. No allowance will be made for any expenses incurred for correcting any defective workmanship and/or material without written consent by Stellar Technology. This warranty is in lieu of all other warranties expressed or implied.
